

CHONTICHA SUKCHALEE

COMPUTER ENGINEERING STUDENT Available for internship : Oct 2026 – Jan 2027

(+66) 81-491-2676 • chontichas.contact@gmail.com • Si Thep, Phetchabun, Thailand

Github: github.com/Chonticha-t

A Computer Engineering student looking for a **Full-stack Developer** Internship. I am eager to apply my programming and web development skills to real projects, learn from professional engineers, and support the team in any way I can.

EDUCATION

Bachelor of Engineering in Computer Engineering (B.Eng.CPE)
Suranaree University of Technology, Nakhon Ratchasima, Thailand

Expected Graduation 2027
GPAX: 3.77

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Go, Python, Java, C, SQL

Frontend: Next.js, React, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Go(Gin), GORM, REST APIs, JWT, Spring Boot

Database: PostgreSQL, MySQL, SQLite

DevOps & Cloud: Azure, Docker, Kubernetes, Jenkins, Grafana, Cloudflare, Nginx

Tools : Git, GitHub, Figma, Postman, Draw.io

Hardware & Networking: Computer Networking (Cisco VLANs), Arduino, ESP32

WORK EXPERIENCE

UI/UX & Embedded Software Developer

May 2026 – Present

HealthLink – Blood Pressure Monitor Software

- Designed and implemented a clinical GUI for a health kiosk using Python (PySide6) to display real-time patient data and system status (Wi-Fi/Bluetooth/Battery).
- Build a dual-mode UI architecture featuring a mock mode for design testing and a production mode integrated with hardware via REST APIs.
- Collaborate in a cross-functional team to align the interface with Raspberry Pi, ID card readers, and BP/SpO2 sensors.

Tech : Python, PySide6, REST API

Full-Stack Developer

Jul 2025 – Dec 2025

Water Billing & Residential Payment Management System | Surasawat Village

- Developed a production-ready full-stack web application features resident management, automated billing, and reporting dashboards.
- Architected layered RESTful APIs and background services integrated with Docker Compose to optimize system performance and streamline deployment.
- Collaborated directly with the client to gather requirements, translating manual business processes into a scalable software solution.

Tech : React, TypeScript, Go (Gin), GORM, SQLite, Tailwind CSS, Docker, JWT, Cron

AI System Analyst & Backend Developer

May 2025 – Jun 2025

AI Foot Pressure Analytics Backend Platform | Suratech Company

- Developed FastAPI backend services and RESTful APIs for an AI healthcare analytics platform.
- Integrated OpenAI GPT-4o to analyze gait and foot pressure for personalized health and fall risk assessments.
- Built multilingual voice pipelines (STT/TTS) with AWS S3 for audio storage and persistent chat history.
- Designed relational databases using SQLAlchemy, implemented JWT authentication, and collaborated on AI workflows.

Tech : Python, FastAPI, OpenAI GPT-4o, SQLAlchemy, PostgreSQL, AWS S3, JWT

IT Inventory Support

Feb 2025 – Mar 2025

Suranaree University of Technology Hospital

- Conducted site surveys and gathered user requirements for a 600 workstation hospital deployment.
- Managed daily deployment logs and inventory tracking to ensure 100% equipment accuracy.

AWARDS

- 1st Place | ENGi Research to Market (ENGi R2M) LumeGrad – AI-Powered Automated Exam Grading System

Feb 2026

 - Co-conceptualized an AI product for grading objective and subjective exams.
 - Conducted TAM/SAM/SOM analysis to target high-potential market opportunities.
 - Developed online/offline GTM strategies and value propositions to position it as a next-gen AI platform.
- 2nd Place | C2C TechX Program (Supalai) AI Talent Scoring System on an HR Tech Platform

Nov 2025

 - Designed an AI recruitment platform concept focused on verified skills instead of just resumes.
 - Created automated workflows to screen candidates and cut manual HR work by 45–75%.

ACADEMIC PROJECTS

- Badminton Tournament Management Platform (Capstone)

Jan 2026 – Present

 - Developed a tournament management system featuring automated scheduling, real-time live scoring

Tech: Next.js, React, Prisma, PostgreSQL, Redis, Docker, GitHub Actions
- Cloud-native Student Check-in Platform (Cloud Architecture Mini-Project)

May 2026

 - Containerized applications with Kubernetes deployment, Jenkins CI/CD, and Ansible automation.
 - Monitored system performance using Prometheus and Grafana.

Tech : Go, Node.js, Docker, Kubernetes, Jenkins, Ansible, SQLite
- Computer Leasing Management System (Software Engineering)

Nov 2025 – Jan 2026

 - Co-developed a full-stack decoupled web platform featuring 10 integrated modules for IT procurement and asset leasing.
 - Delivered features incrementally using Agile/Scrum methodologies across bi-weekly sprints

Tech : React, Spring Boot, PostgreSQL, Raspberry Pi (Server Testing), Git/GitHub.
- Interactive Cyber Investigation Platform (Cyber Security Mini-Project)

Jan 2026

 - Developed puzzle-based cybersecurity investigation workflows with terminal simulation interfaces.
 - Implemented AI-assisted interactions using Gemini API with responsive, usability-focused UI design.

Tech : React, TypeScript, Vite, Tailwind CSS
- Residential Management System (Systems Analysis)

Jul 2025 – Sep 2025

 - Architected secure backend systems using Clean Architecture (RBAC, JWT, CSRF) for resident, contract, visitor, and reservation management.
 - Developed payment workflows featuring multi-stage approvals, automated receipts, and analytical dashboards for business reporting.

Tech : React , TypeScript, Go (Gin), GORM, SQLite, JWT
- Omakase Reservation System (Database Systems Mini-Project)

May 2025

 - Designed normalized relational schemas and ER Diagrams for a full reservation management system.

Tech : MySQL,SQL

EXTRACURRICULAR ACTIVITIES

- Food & Beverage Team | ENGiRun68

Mar 2026

 - Co-led a team of 8 to manage catering and logistics operations for EngiRun69, successfully coordinating food distribution for over 2,000 participants.
- Concept & Operations Organizer | Battle of AI

Aug 2025

 - Co-conceptualized the event theme, designed game mechanics, and provided key operational support to ensure a seamless event execution.
- Welfare Department Co-Lead | The 2023 Commencement Ceremony of Suranaree University of Technology

Mar 2025

 - Co-led a core team of 5 to manage the computer engineering graduation ceremony's welfare department, optimizing resource allocation to ensure smooth operations.
- Welfare Team Support | iTech iMac Sports Day

Nov 2024

 - Managed and distributed drinking water and beverages for athletes and participants during the sports event.

ADDITIONAL INFORMATION

- Languages: Thai (Native), English (Basic - CEFR A2) currently improving
- Soft Skills: Creativity, Team Collaboration, User-Centric Mindset, Accountability, Continuous Learning
